**Besides not having enough time in your school day, what are the major obstacles to using technology in your school?  
(Check all that apply)**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
we can't access our personal email	Girl	Grade 6
fewer time on computer	Girl	Grade 6
teachers hate kids	Boy	Grade 6
kids don't really like teachers	Boy	Grade 6
using my own device	Boy	Grade 6
like not letting us bring recorders so we can record what she says so that we can get the help we need when we get home to do our homework.	Girl	Grade 6
limit to access	Boy	Grade 6
some teachers don't use their technology and do not let us use technology but some do use technology	Girl	Grade 6
we can't play any FUN games!!!	Boy	Grade 6
not able to go on games when done with assignments	Girl	Grade 6
not able to go on games when done with assignments.		
nothing to do it on	Boy	Grade 6
having unlimited internet sites to use	Boy	Grade 6
not a lot of assignments to do on the computer	Girl	Grade 8
Teachers think we can't use technology and underestimate us, when we have been learning this for over 6 years.	Girl	Grade 8
The Computer is running off of the most small and limited hard drive I've ever used!!!	Boy	Grade 7
Teachers Take A Long Time To Explain Stuff.	Girl	Grade 7
can't communicate with others in the computer room	Boy	Grade 8

(Check all that apply)**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
some teachers are tech-stupid and could not even use a simple smartboard cdrom drive	Boy	Grade 7
don't let us pick the websites we need to research from	Girl	Grade 8
No creative outlets. Creates thoughtless cookie-cutter projects that accomplish nothing.	Girl	Grade 8
limited computer use	Girl	Grade 8
Not enogh time to complete assignments due to slow computers. Also, no creativity involved. Creates boring projects.	Girl	Grade 8
not having our on freedom on the internet.	Boy	Grade 7
cant listen to online music	Boy	Grade 7
the computer lab is usually full	Girl	Grade 7
i can't always ues internet	Girl	Grade 7
teachers dont let you go to certain places	Boy	Grade 7
we cant access our email	Girl	Grade 6
i cannot use a computerdonig my homework	Boy	Grade 6
not having alot of computers for the class	Girl	Grade 6
we don't have time	Girl	Grade 6
I am not allowed to go on chat websites, Grrr	Girl	Grade 6
there's not much technology to use	Boy	Grade 6
not enough computers	Boy	Grade 6
some websites are unavailible to use	Girl	Grade 6

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
there is not enough time for each class to go every day.	Girl	Grade 6
teachers dont know notin	Boy	Grade 6
being able to get on game websites	Girl	Grade 8
dont always have permmision	Boy	Grade 7
filter goes off and on	Boy	Grade 8
cant use our phones	Boy	Grade 8
cant text parent if a ride is needed home or if m staying after schoo	Boy	Grade 8
not understanding the work	Girl	Grade 8
the schol day is to long.	Girl	Grade 7
to much time in school day	Boy	Grade 8
Have to share computers	Girl	Grade 8
they dont let us text and i dont he why is so bad!!	Girl	Grade 7
not able to listen to music from internet	Boy	Grade 7
Not alowwed to have advanced technology at school.	Boy	Grade 7

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

**In some schools, students use mobile devices (cell phones, MP3 players, PDAs etc.) to help with schoolwork. How would you use a mobile device to help you with your schoolwork?  
(Check all that apply)**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
we are not allowed to use cell phones or ipods during school.		
i think that if someone doesn't have a calculator then the cellphone can help you. and txtng to if you need something	Girl	Grade 8
call friends and tell of up coming events	Boy	Grade 8
text friends to learn how to text better		
help witstuff we dont get and are afriad to ask the teacher how to do it		
calculater	Boy	Grade 8
liosten to music while doing work so you arn't tempted to talk.	Girl	Grade 8
use as calculator	Girl	Grade 7
calculater	Boy	Grade 7
Instead of writing an essay or paper, text it to yourself if you are faster at texting than you text it instead of write it than send it to yourself..	Boy	Grade 7
use stopwatch, clock, or timer		
like when its work time listen to music and it helps me focus	Girl	Grade 7
lisening to music helps me think and stay on task	Boy	Grade 7
Listening to music helps me to focus on my work so access to mp3s would be nice.	Boy	Grade 8
i would learn		
Listen to educational music	Girl	Grade 7
use internet for projects	Girl	Grade 6

<b>SAEGER MIDDLE</b>		
type a report	Boy	Grade 6
go on internet to find some answers to homework you did not get enough help on!		
tell a friend that we need to do other assiments like hey we need 2 do this do you need help i need help or something like that.		
cell phone	Girl	Grade 6
I would call my friends or allow calls if i dont get something to help		
text to work, oh and i'm GODZILLA.		
need better computers		
calling friends for reminders	Girl	Grade 6
text people		
study with friends		
to call parents if needed	Girl	Grade 6
have my cousin help me to find out what i need.	Girl	Grade 7
we are not allowed to use mobile devices	Girl	Grade 7
use the caculator on my phone	Boy	Grade 7
calculators and unit converters.		
Call classmates about assignments		
use a calculator on my phone.	Girl	Grade 7

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
listen to music to help me think better		
text a friend to help with something	Boy	Grade 8
use my phone to keep track on what i need to do for my assignments and what day i need to do what homework	Girl	Grade 8
talk to people in class by texting if i dont get	Boy	Grade 8
phone calculater	Boy	Grade 7
mp3 or ipod would be used for listening to music like i am in band and we have a webpage that we can download our consert music to are ipod and i could listen to it while i work		
save notes on my laptop for easyer orginaization later	Boy	Grade 7
block out unessecary noises during a project our during a test.		
Record information for tests	Boy	Grade 8
caculator	Girl	Grade 8
questions on school websites	Boy	Grade 8
let us use ipods and phones and so on	Boy	Grade 8
use a tablet pc to get school news, turn in homework, and get online tutoring	Boy	Grade 8
sometimes music helps me work		
MP3 player	Girl	Grade 6
we could use cell phones as a alarm for when class is doing to start or the bell is going to ring.		
they go to chatrooms	Girl	Grade 6

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
email others the projects	Girl	Grade 6
use recorder from mp3 to help me studywitha spelling test	Boy	Grade 6

**How could your school make it easier for you to work electronically?  
(Check all that apply)**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
Updated Software	Boy	Grade 6
texting people		
provide virtual computer		
provide virtual tutoring classes	Boy	Grade 6
put safe search on high	Girl	Grade 6
let us go to our own websites such as chatrooms ect.		
Use computer more often	Boy	Grade 6
let us wath educational videos all videos are blooked by the fire wall	Boy	Grade 6
keep s few firewalls like for myspace or facebook		
Provide more fun ways to keep track of homework		
let us use are cell phone only when nessasary	Girl	Grade 6

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

(Check all that apply)**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
we should use computers more to save trees		
stop asking us questions!!!		
use as calculator or for easy internet	Girl	Grade 7
but for the projects software to work the teachers would have to download a fire wall and not use a modom because people can hack modems so fast it would proply scare alot of people and a clean sweep softwere to get rid of cookies and posiable a hack soft were to stop the noobie modders		
Firewalls focus on real unsafe sites instead of ok ones with a single flaw	Boy	Grade 7
we are not allowed to work together and with who want.		
stimulate my fingers and senses	Boy	Grade 8
make parents buy me laptop	Boy	Grade 7
More laptops	Boy	Grade 6
let us go to our MYSPACE ACCOUNTS		
let kids go outside and play games all day		
i would like a GODZILLA website		
It helps me when i lidten to music	Boy	Grade 6
let us educational games	Boy	Grade 6
let us use have them do the homework with us like tell themwe need help and she go though them all with us.		
put laptops on the supply list for research to do at home and stuff	Girl	Grade 6
if kids had little smart boards!		
let us have cells on at school	Girl	Grade 6

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

<b>SAEGER MIDDLE</b>		
dont hold me back when i wanna use a computer		
I understand that blocking some websites is needed and for our safety but some websites that are very helpful in doing work are blocked.		
A wireless school network with internet access on the campus		
allow better games		
New software tools. (animators, MP3 files, video makers, movie editors, etc.		
Use laptops to bring home if we are unable to use the computer that night	Girl	Grade 6
listen to music	Boy	Grade 8
unblock some useful websites like youtube	Boy	Grade 8
Youtube :-)	Boy	Grade 8
laptops for everyone!!	Girl	Grade 8
cellphones	Girl	Grade 8
Only block sites that REALLY need to be blocked	Boy	Grade 8
use my own cell phone.		
not blocking any websites	Boy	Grade 8
cell phones	Boy	Grade 7
have recordings of the class or something you dont no about on your ipod or cell phone

**Why would you take an online class?**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
Never have never will.	Boy	Grade 7
For fun		
less paying attention	Boy	Grade 7
Nothing		
Because it also sounds cool and a fun way to learn how to do something on a online class.	Girl	Grade 7
you can press pause.		
Cooler classes, no incompetent teachers. No classmate problems. No discipline distractions.		
It probably be more fun.	Boy	Grade 7
there will be one student per teacher	Boy	Grade 8
To Be On Computer Other Than Reading Out Of Boring Textbook	Boy	Grade 8
I dont need an online class dumb shits		
i wouldnt take one		
i would not take an online class, to boaring		
i dont want to there stupid (:	Girl	Grade 7
i dont want to ok		
For Fun	Girl	Grade 8
I dont take an online class		
keep me from getting behind	Girl	Grade 6
i don't think i need a online class in /out of school.		

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

**Why would you take an online class?**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
im NOT interested in taking online classes		
i dont		
so that if we don't understand something then we can get extra help in that subject(s)		
and to do other courses that i can not get on my regular scheldel		
to get more educaded	Girl	Grade 6
to not have to take the class in high school	Girl	Grade 6
so i can text people		
it would allow me to concentrate because i would have to read it but both works	Girl	Grade 6
i shouldnt have to my teachers should tell me what to do the first time instead of telling me to do i	Boy	Grade 7
I dont want to take an oline class	Boy	Grade 6
More class choices.	Boy	Grade 7
i wouldnt take an online class	Girl	Grade 7
No classmate distractions. Good lessons. No problematic teachers.		
Assignments don't have a due date online.		
i don't want to take an online class ever		
I dont		
art classes	Girl	Grade 8
It would be an interesting experince	Boy	Grade 8
I wouldn't	Boy	Grade 8

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

**Why would you take an online class?**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
I would'nt	Boy	Grade 7
more comfort		
to be able to finish class work faster than in school	Girl	Grade 7
It doesn't matter what you wear for those, cause you would be at home.		
more challenging class to extend learning	Girl	Grade 7
To keep up my work		
More knowledge.		
i dont want to	Boy	Grade 7
to get what was missed in class		
i am not interested in taking an online class	Boy	Grade 8
so videos would be more interesting to watch and u could pause them to eat a meal or feed your pets or something		
it teach me even more then I already know adout a computer		
more time to research a subject and work on projects.		
to get involved with kids my age all around the u.s.a and here what they have to say on the topic i am learning for school and to help me understand more		
it can help me larn a little bit more		
i dont want to take a online class	Boy	Grade 6
because maybe if you had a question to ask you wouldn't have to wait for ever until u go home!		
to help me with grades		
heip me to be more prepy

### If you have taken (or thought about taking) an online class, how might this type of learning make school more interesting?

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
I would be more organized		
I haven't taken an online class.	Girl	Grade 7
you dont have to worry about what other students might think of you.		
I would not have to deal with rude kids that interrupt the class constantly. I also would be a ble to go my own speed.	Girl	Grade 8
never did		
i wouldn't feel embarrassed to ask questions that i don't understand.		
Nothing		
i think we need to text people in school		
i didn't take a stupid online class geez stop asking		
i love it		
I wouldn't be able to connect with classmates	Girl	Grade 6
so that we can tell friends that we need help with other things.		
I havn't taken one and don't want to	Boy	Grade 6
to feel a little smarter knowing what we are talking about in some classes.		
i dont want to dont ask me again		
i dont want to take an online class		
i dont want to		
Not having to wait for others to catch up	Girl	Grade 8
i may be kinda scared the teacher my be an on line rapist

<b>SAEGER MIDDLE</b>		
i am interested in science. thats it	Girl	Grade 8
Depenens on what type of jobs there are and how much they pay.		
im going to get a job that pays		
stop asking QUESTIONS!!!!!!!!!!!!!!!!!!!!!!		
I want to learn how to use science and technology to be a forensic analyst		
I already have a career path set out, and I don't intend on changing it any time soon. So, no. Thanks, though.		
No, the subjects are interesting but I'm more interested in a musical career.		
i dont know much about what you do in those jobs but those are some of my strengths so i could get more informed		
not really	Boy	Grade 6
no im goin to be famous and make money		
I'm not sure yet, there are many options for a career and I haven't decided yet.		
being a fashion desighner because all my friends and others all know soon I will be one and I need to be good at math to do this job and I am pretty good at that and thats my job I want to be!		
not sure yet	Boy	Grade 6
the subjects kind of board me i am good at them but they are boring		
because they might bore me and not be as fun		
yes because i'm going to collage		
i want a freaking good paying job		
I am undecided	Girl	Grade 6

**You are a student reporter for a national online news program and your assignment is to create a podcast or video about a topic of interest to students. What is your topic? Who would you interview? What questions would you ask? How would you share it with others?**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
if i was a reporter i would research sports and the development of athletes. i would interview successful, professional athletes. my questions would be like What was your childhood like. i would share it through the internet	Boy	Grade 7
My topic would be about people and teens. i would interview teens that are having problems. A question that i would ask is "What problems do you have with school?". I would share it with the others by sending it to everyone's laptops.		
If I was a student reporter for a national online news program, and was assigned to create a podcast or video on a topic of interest to students, I would probably create a podcast on the affect of technology on the average student, and how they learn. I think that it would really give kids a way to connect learning with everyday life, and give them something to voice their opinions on. I would probably interview kids to see their opinions on it, as well as teachers, and maybe even some parents as well. I would ask them if they would like to see more technology incorporated into the school's learning curriculum, like having a typing and/or computer class available to take, or even required. I would then share this information with others by giving the video or podcast to teachers (by linking it or saving it onto a disc) at my school so that they could show it to the kids in their classes, and then let everyone discuss it, and voice their opinions.	Girl	Grade 7
I would interview a nascar driver	Boy	Grade 7
My topic is comm arts. I would interview some people who are doing good with comm arts and some people aren't doing so good in comm arts. I would ask them what they like about the class, if they like their teacher, and if they enjoy writing about their feelings. I would just say how people like writing & things (:	Girl	Grade 8
my topic is math and i would interview the math teachers and the principals to see what they are doing to help students.	Boy	Grade 7
my topic would probably be about space or something to do with that area and I Would interview scientist about these ideas. i would ask about the cosmos and about possible area that might be inhospitable to humans.	Girl	Grade 8
My topic would be my education, such as how far are we going to have to put up with the ignorant bliss and disregard some people are taking in their schools discipline? When will we see some justice in the people who threaten the schools and its students? When? When?		
The topic i would do is volleyball! I would interview volleyball players that are on my team. I would ask How much time they spend playing volleyball and who inspires them the most to play volleyball?? I would share this over the internet or t.v.	Girl	Grade 7
my topic would be school subjects. i would interview teachers. i would ask about homework and upcoming stuff. i would make it interesting.	Girl	Grade 7
football. marvin harrison. how did u get to be so good? put in news paper	Boy	Grade 7
bullying/ i will ask a teacher or the principal or officer creg. how to get a bully to bullying you. Get rid of a bully	Boy	Grade 7
science, everyone, a lot, i don't know	Girl	Grade 7
i would ask students how they would use or apply to the rules and standards

my topic is alcohol my family internet

My topic is car designing  
lamborghini designer  
what does it take for you to make a car design?  
newspaper

I would talk about other technology than what we already have being let into school. I would interview the school board. I would ask to have cell phones, i pods, mp3 players, etc. to be let in school. I would share the interview by txts, videos, blogs, etc.

I would interview Bill Gates and the questions I would ask him are what did he do to earn all of things he has, and if Microsoft is going to grow any bigger.

Boy

Grade 8

My topic to intrest students would be how to stay social or popular even friends with others without being mean, perfect, athletic, skinny, rich and pretty. I would interview Tyra Banks because she always talks about self confidence and inner beauty. I woould ask questions like:

How do manage staying the same without drugs?

What kind of background do you come from?

Did you have alot of friends throughout your school years?

I would share this with others by making it a podcast or video to show to others.

My topic would be Designing Clothes. I would ask anyone that is in a clothing buisness or that knows alot about clothing. I would ask what tasks do you have to complete, how many tlk shows do you have to do about your buisness, what is it like behind the stage at modeling shows, how does it feel to meet real models for the first time like your idols when you were a child, how does it feel to have your very on design come out and you see people buying them, and hoow mush money do you make at this job? I would make a presitation and take pictures and present it to others.

something that would be recently discovered but has some effect on our daliy life

Girl

Grade 8

Why most children dont like school. I would interview random children so their would be no set answers. What do you like or dislike the most about your school. I would make a graph of my results most likely a pie chart.

Boy

Grade 8

the students need more tecnology at the scools and i would be interviewing the princepal the questions i would ask are these students getting the technolkogy they want...

Barrak Obama because he is a great role modle and i think the kids would really like that and learn from it.

Girl

Grade 8

mytopic is football  
i would interview brett farve  
i would ask why he went to the jets  
i would tell them

Boy

Grade 8

My topic would be whether students should be allowed to use cell phones at school. I would interview random students from the school, and I would ask them if they think cell phones should be allowed and why.	Girl	Grade 8
my topic would be on oline textbooks. i would interview the princebal. and i would ask how this would help the students learn and if they would like this better becuae if they dint like it they would not do it.		
I don't really know.	Girl	Grade 8
better food	Boy	Grade 7
My topic would be intrest in completing school and going to collage. I would interview kids from 7th through 12th grade. it seems to me that many kids are no longer interested in school and don't really care about their future.	Boy	Grade 7
My topic would be explosives. I would blog about it. I would interview an explosives engineer. I would ask questions like " What is the easiest bomb to make"	Boy	Grade 7
my topic is astronomy. i would intervue a astronomer. i would make a camershal.	Boy	Grade 7
The topic I would chose is are they safe at school and are people learning what they need to be learning. I would interview students in all grades and see what they say. I would ask questions like do you like school, what are you learning, are you learning anything, are you safe at school, do you need someone to help you in your class and i would ask what do you like aout our staff and school and one mopre thing i would ask do you think school is fair or unfair. I would get all the staff together and talk about it nad how the school can get better and safer for students.	Girl	Grade 6
My topic would be are you afraaid in school. I would interveiw all people from students to teachers. I would go to all schools bad and good. The questions i would ask are do you feel safe coming here, are students attacked, do teacher hurt you or are they here to teach you, have you had police come for any issues, and do you feel safe here? Something along those lines. I would share this information by blogs,podcasting,maybe through the news if it was important enough.		
Football, football players, What is it like to be a football player? What is your greatest memory as a football player?	Boy	Grade 7

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
i whould intervow a prenubal and ask him what he will change the school	Boy	Grade 8
I dont know.	Boy	Grade 8
bill gates ask him for money how did he suceed whats his motivation.		
do teachers really care about the studnets i would interview all the teachers question #1 do u really care if we go to college. question #2 do u want us to fail	Girl	Grade 8
I don't know what I would do it on because if I was supposed to dp it on something everyone likes, I don't know what everyone likes because everyone is different.	Girl	Grade 8
i dont know		
Facebook would be my topic. I would interview the creater and ask how did you make it, why, were you expecting it to be that big, etc.		
My topic would be about extinct animals. I would talk to a zooligist. I would ask them about how could I grow awareness of extinct animals.	Boy	Grade 8
too broad of a question	Girl	Grade 8
no opinion i can't talk to strangers!		
I would do my topic on the war i would propely interview some of the old veratins that served in the war.	Boy	Grade 8
My topic is writing and I would interview authors and ask them questions about how they got started and how they got their first books published.		
I would probably talk about something related to pop culture - movies, CDs, mp3s, celebrities, etc. Students respond to current events because they feel like they are a part of it. They want to know what's up NOW. I would interview the editor of TIME magazine to hear about all kinds of news that has to do with our generation, and why it could affect us in the near future. Perhaps science discoveries, new technology and gadgets, "futuristic stuff" - hovercrafts and the like. Also maybe a cool twist on global warming, without all the lecturing about how we're destroying the earth. Death threats are NOT entertaining. I'd share it as a podcast (on the internet), on TV, and possibly on current radio.		
My topic is people and I would pick Donald Trump. I would ask how he got so successful.	Boy	Grade 8
architecture.architect.what its like pay require ments etc. assemblly	Boy	Grade 8

<b>SAEGER MIDDLE</b>		
my topic is getting laptops for every student. i would interview different students. i would ask how they liked the idea and how they would use it. i would share it with others by talking to them about it.	Girl	Grade 7
My topic would be on education. I would interview teachers and people who experienced teaching. I would ask questions, such as is it easy teaching kids? Do most of the kids want to learn that you teach? I would show people what people think about them an maybe they might change.		
My topic would be pollution. I would interview students. I would ask them what they think of pollution, and i would make a video on it.		
My topic would be myspace because i think that a lot of middle schoolers go on myspace but all they do is talk to their friends (like me) but i think that they should have an online book or link to school websites for links to their teachers so they can contact them whenever they need to.		
My topic is math. I would interview students. I would ask them if they like math or what they don't like about math. I would put it on the internet.	Boy	Grade 7
My topic would be on the company apple! I would interview they creator of apple inc. I would ask what is your next electronic he is going to invent and how is it going change the way we live today and could it change the way we live? Put it in the news paper	Girl	Grade 7
my topic would be foot ball and i would interveiw donte hall	Boy	Grade 7
i would interview mark mcgwire and the questions i would ask him what does it feel like to hit a homerun ?	Boy	Grade 7
My topic would be obesity. I would interview doctors and scholars and ask what causes obesity and how it can stop. I would also get many people involved.	Girl	Grade 7
my topic would be pet we all love.i would interview friends and family.what types of pets do you have.news paper.		
the Trojan War. Archeologists. When was it? Why did it happen? who was involved? Through video casting and podcasting	Boy	Grade 6
My topic would be about art. I would interview artists or art teachers. I would ask why art is important or how does it help. I would share it with others by the internet or schools.	Boy	Grade 7
My topic would be comedy. I would interview three people; A proffesional comedian and two students		
Nfl football, i would interview tom brady and ask him what being in the nfl is like. I would share how tom brady never gives up		
My topic is flat out education in science technology. I would interview individual students and their science teachers to figure out what they're learning and just how they're learning it. I would ask them how they do in school and how they feel about the technology they work with in science class. Finally, I'd put a report on all of the data I've collected into a power point presentation.	Boy	Grade 7

**You are a student reporter for a national online news program and your assignment is to create a podcast or video about a topic of interest to students. What is your topic? Who would you interview? What questions would you ask? How would you share it with others?**

<i>Response</i>	<i>Gender</i>	<i>Grade</i>
<b>SAEGER MIDDLE</b>		
My topic would be drug use in America. I would interview kids about what they think of drug use. I would ask questions like...	Boy	Grade 7
What do you think of drug use in America? Do you think any drug should be legalized? Should cigarettes and alcohol be outlawed even for adults?		
my topic would be sports.I would interveiw people on the sports teams. i dont know what questins i woul ask.i would post it online.	Boy	Grade 7
my topic is baseball. i would interview a famous baseball player. what made you want to start playing baseball?	Boy	Grade 7
My topic is about vet's. I would ask do you get scared when you give an animal a shot? I would share it on T.V.	Girl	Grade 7
i would do a a video on wayne gertzet and i would ask him how long has he been playing	Boy	Grade 7
1. what do you want to be when you grow up 2. how do you plan to get this carear 3. what collage do you plan to go to	Boy	Grade 7
My topic would be about technology. I would interview a scientist who knew a lot about technology and devices. The questions i would ask would be "Do you think the students should be able to use their cellphones at school,for school purpose?" Another one would be "Should students be able to have more use of internet and have their own laptops?" How i would share this with other is by putting it on the internet or t.v. (if could).	Girl	Grade 7
wild life	Boy	Grade 7
My topic would be on how to design roller coasters because a lot of people love to ride them so it would probably be really fun to learn about them. I would interview a roller coaster enginer because they would know the most about roller coasters. I would ask them "how		
i would interview Mrs.Hall about the library. ask her how many books are in the school.	Girl	Grade 7
My topic would be on why school is important. I would interview a professional athlete so the kids would be into it. I would ask them why school is important and how they did in school.		
My topic would be bullying in 7th grade. I would interview people who get bullied more than other people. I would ask things like "are you late to class often?" and "how many times are you bullied in one day?". I would make a video of it and post it on the internet.		
All work no play.Government. Why don't you close down websites like mspace and faceook because they are destroying the youth of America, and i hate thous websites.

I would improve schools by letting the students have online classes to take at their school, let them have a more freedom on the internet, and have recored classes for students to watch if their sick.		
the one thing i would do to improve schools education is to make sure that every kid can make an improvement with them self and be as well as the they want.	Girl	Grade 7
HAVE SCHOOLS TEACH ABOUT EXITING TOPICS,(UNLIKE NOW)AND MAYBE HAVE BETTER TECHNOLOGY.		
I would make sure all the kids at the school had a laptop or some kind of internet access so the kids would know how to use a computer to the best of their ability.		
i would tell all the military to make a helmet that you put on for an hour every day and you will know every thing		
I don't Know.		
Allow choice in studies so the students are only taking classes that will help them later on in lfe		
i would make the people take a test to be able to get out of high school and if they don't pass then they don't graduate		
Make the schools the best they can be and 5% of taxes go to schools having laptos for everone		
i would add career sims to show students what they could try to be		
First i would destroy every website except educational ones, I would get rid of all movies,and Television that is not educational. I would increase tax flow to schools, make kids have more homework, and harder classes. And make kids finish high school NO EXCEPTIONS!		
I would say that all kids need to be on track with the others and there would be challenged classes for every subject.		
I would make classes more interesting and involving so the kids like school.		
i would make sure children cant dropout of school and the classes interest the students.		
i would have everyone a laptop and access to the internet so they get a better education and the teachers know how to use the computers not just the computer teacher.		
reduce number of students in room s have recces more laptops

How i would make students receive the education and skills they need is by, making sure every teacher cares of each student in their school. Every student gets the right respect. If a student is having trouble and is scared to ask a question the teacher and the student should be talked to indivigly, so student wouldn't get scared or afraid that they would be laughed at.

what i would do to ensure students have the education and skills they need is i would have successful people come and talk to the students about why they need an education. i would also have each student share ideas with each other. m

Not make them leave home to go to work

make it more fun in the schools so that every kid pays audtion

I would say if you don't get a job you will be a hobo

Each student would have a personal learning system to help them at their own pace.

I would try to have some technology available for the students to learn, and make sure teachers are good for the job and aren't too strict or too easygoing.

i would let them use their phones and their mp3's because some people can work eaiser with music. i would also have electronic text books. so that every text book you need is in one and you will only have to carry one book instead of like five.

make sure we have the right equitment (which we dont)

Make them repeat the assignment if they do not receive a high C,B, or A (75-100).

give the schools anything we could afford that they need.

I would have the kids take a survey to see what job they are most likely to be at in the future, and make sure that they are put in classes that prepare them for that future.

Ask them what they want to be.

i would talk about the types of jobs there are and what you do and how much money you make.

that all there needs to learn would be reached and that the teachers are good.

i woud do more projects and i would make sure that every student would have a computer and an email address so that they could contact me at all times and contact their teachers

<b>SAEGER MIDDLE</b>		
I would all equipment is up to date so that it would be able to run fast and everyone with the information on what they need.	Boy	Grade 7
have very good techers for each student		
The one thing i would improve on is learning different things outside of the regular four core classes, And make sure that technology is used frequently, because most every job uses technology in some way or another. So if the students learn about different jobs and the technology that those jobs use, then they would most likely be more successful.		
I would make sure each student has the same tools every other student has and that they have an equal chance as all the other students.		
I would try to make school more interesting to kids so that they would pay attention more and they would understand things better. They will be more interested in a topic that is fun to learn and experience.		
I would make schools more choose able like the kids can choose a class that they are interested in and if they can't choose then they will have to take regular classes and I would make it where there are no kids left out.		
I would give all the schools labtops or computers. and give all the schools money fore that.		
i would probably make a class for each student where it is only them and a teacher who they can get close to and learn about what they want.		
have good teachers not borning teachers		
WhatI would do is I would have unlimited tech time and have healthy food at lunch(apples,pears,salads ect.)		
one thing i would do to improve schools to meake each and every student have a wonderful education would be, i would have so many tablet pc for each student to help them learn better and get an education worth while.		
they could use here cell phones for resources and internt and all the materlials the need.		
i would make sure that the schools had cooking classes and labs.		
I would make every job involves going to college for at least an year so people would be intersted in a job and say, Hey i am going to college so I can get a job so I can stop living with my parents that baby me.		
I would include more online classes.		
i would improve in schools i would let them use their cell phonnes because if they miss school they could ask their friends

SAEGER MIDDLE		
i would make them have really nice and smart teachers		
make sure every student has skills to get a job		
have electronics		
i would put more technoligy in the schools so they can learn better.		
that there is different classes that help you in that way there are some things we dont need to learn unless your going to be a reacher or teacher of it.		
all students get equal attention and respect.		
I will give more classes	Boy	Grade 7
give them all the nessecray resources for susscedding		
Making sure that students learn in 3-D and not just off of worksheets and out of textbooks. Students nowadays often cannot solve a problem that is not set up perfectly. Real life involves thinking on your feet and actually UNDERSTANDING concepts as opposed to copying what the teacher writes on the board. This could be why students often do not do well on tests. They cannot solve the problems themselves. This could be done through discussion and less emphasis on "technical terms." More emphasis on the actual idea, and how to apply it.		
Make sure that everyone has the same opertunities		
Let student use laptops to play games on.		
Find a career that is good for you and if there a class about it just choose it and do good at it		
I would probley hire conclers and they can tell and some good teachers thats what iwould do to make sure they get good grades.		
I would make sure all schools are safe, organized, clean and also healthy.		
fake tests

I don't know because I would never even think of running for the president! Not because I believe that I wouldn't make, but because I don't agree with many things the government does and so I would just be goes right along with it.

I would give schools and better budget and have the finest teachers teach the students.

i dont know

they would have access to online classes so they can work at their own pace and get everything their working on.

I would make sure every student is treated with respect by their teacher and their teachers are given respect from the students and make sure every student understands each lesson or topic well enough to pass class tests and quizzes.

give every one a electric PDA or planner hooked up to a school site or educational learning programs ur using or internet and get e-mails from teachers about assignments and and extra help along with communication to other people like other students.

make sure every student has a pda and a laptop

i will go to ever school and ask them about what job they what

i would personilize every students need so that they have what they need to succeed

To make sure that students would be successful in life I would have the student go to the job that they would want to do for a few day and see how they are at it. And if they are good then I would know that some of the students are prepared. But for the students that are not ready I would have them do more studying on the job interest and see how they do.

I would make sure that each student is trying and have tests (not graded) to see how far a student is on their learning ability.

Students should have there own personal laptops with all internet access.

give them alol laptops

Unlimited tech use

Make sure teachers pay attention and treat each student respectfully and make sure they have individual progress.

these dont make sense

i dont kon

I would have a servey to see what kids want to do and have classes that will help them achieve that

would give them more options

I would take through middle school for a student to pick three different things that they might want to do in their lives and during their four years of highschool I would have them deeply study those three topics. That way people would be able to have a high intellectual knowledge about said topics.

Make sure they know what classes they need to do there job.

Once again, no idea.

let them have freedom

Explain to them what most jobs are like. And when the sudents take a "What Job you Should Do" test, they will actually get back the test results instead of never hearing about them again.

have hands on training.

That they have a graet place to learn and that we like school and that it is fun.

i would let them talk and text eachother during class encase they have a qusetion and the teacher wont answer it or like they are talking or something:)

i would deffinlay want to improve schools because i dont think kids these days care enough cause know ones there to make them. so i would deffinally put fewer kids in classes an makesure there was extra help if somebody needs it. I would also try to make school more interesting an not as tiring an stressful:D

if i was a predident i would have more online classes

I would make sure that every student was involved with something extra and no one was left out.

I would first make sure that school is fun and teach kids about the real world and all the jobs out there.

I would make sure learning is the most important thing

I never want to become president.

make sher all students have access to a laptop/computer

i would have smaller classes so the students could be one on one with their teachers and understand lessons easier

I would give each school a 15 minute break to hang out or do whatever so they like school more and learn more half way through each school day.

the one thing i would provide is to improve schools to ensure that all students get a PERFECT egucation or close to it and good dicipline needs.

I would get the best of the best teachers in the countrey give all the highest equitment to help in sure they are learning corectly

Have parents come to school with the students

i would make classes more fun so no students drop out and i would make it no home work

i would make the classes more fun like adding educashinal games and stuff.

I would create more schools so that there are smaller classes and more personal attention.

i would make sure that there was more school but with less kids in each class to enchure that there would be more one on one with the teachers and the students

Boy

Grade 7

I would make sure that every kid had their own teacher to make more jobs and help the kids more. Plus they get more one on one time with the teacher to ask questions and discuss the material.

I would most defenitally make sure there is no racial descrimination. That is very important to me because all kids need to get the same education to be successful in life.

Well well well I would make sure every student can understand the classes that their takeing and if they dont understand that class they will have a tuter if they are still failing that class the teacher should not give up and the teacher should still help the student

The one thing I would do to improve schools to ensure that all students receive the education skills they need to be succceful in life is give the students a half shcolarship if the get their G.E.D in highscool

i would let students use mobile devices

I would provide special classes to prepare kids for the career they are thinking about.

I don't know.

I would ask every kid what they would do to make school help you learn more, and what would help them make sure they would have a good education, and be prepared for college and jobs. It has to be reasonable with school

I would sure the school are well funded so that the can get a good education, and the teachers are all well paid.

I would make it so all the student are in class and make so people won't want to skip class.

make them go through collage

if i was president i would make sure every single student would be able to go to school and get the education that they need to be in suuceful in life.

um i would help students create syudy guides to help them succeed on test and make online classes and have an online classe something required to do in school

give free food to make them more intrested

I would make sure every student would get their own laptop. Also have online classes and online textbooks. Also if they need help in their classes they would get help by a very smart person.

i would give kids unlimited internet access to computer and phone. give them less homework. help them more with school to bring grades up

give every student a laptop free of charge

i would give all kids the option to act grown up to see if their ready and if their not they would get held back.

teach them what they needed to no to do the job they wanted to do.

i would increase the schools supple of things they need to learn with.

nicer schools

i would make sure all students are able to have access to a computer for work or research things they need to know and it will help them to find information.

I would have the best teachers i could find. I would also teach them everything they need to know to get a good job.

If I were president I would make sure there were computer simulations for each job.

let them have access to the internet

Boy

Grade 8

mooo

blah blah blah

Make sure they had good teachers.

The one thing I would do to improve schools to ensure that all students recieve education and skills they need to be successful in life would be to let them work at their own pace, and still have one on one attention from teaches. In simple terms, smaller classes.

I wouLD CLOSE ALL SCHOOLS FOR GOOD!!!and the world will come to an end If i do!!!! muahahahahahahahaha

The one thing that I would do would be toc talk to each student personally to figure out their academic goals and dreams.

I don't care.

i would help others? jk jk

I would make sure that every student has the ability to research using every type of technology. I would also put each student in a class according to their academic level. That way everyone will be at their own pace wheter it is advanced or below.

laptop for reachers

The One Thing That I Would Do To Improve Schools To Ensure That All Students Receive The Education And Skills They Need To Be Successful In Life, Would Be... Give Every Student The Opportunity To Use The Internet More Inside, And Outside Of School, For Assignments And Tests, Instead Of Papers And Pencils.

i would let them do whatever it took to learn and make sure that they understand it as long as it would not be a distraction

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

I think i would open career pions at a young age ao then the kids have a good idea of what they like and what there good at.I would also let them take there time and decide what they want to do maybe in 10th grade beacus i know the 8th graders have to choose before they go to 9th grade because it judges them on what classes they are going to take.

I would put technology in every single class room and surveys that would say the outcome of the right job for a student. And for teachers to allow students to choose what classes they would like to take and have students choose what they want to be. And ensure that teachers arent mean.

The classes would be funner and they would do fun games on the computer instead of work sheets. And mabey do online or virtual classes

when the students re in grade, middle and high school they should submit a list of career jobs that they want to do beginning from the most wanted to the least wanted

to improve schools i would ask them what they would want to do then get personalized attention to them though a person in that feild

I would at least start them at thier job and let them experience it. ftw (for the win)

i would make sure each and every school is giving the proper education. also to see what the student would want their career in and asking them what they are interested in.

if i was the president of the united states my #1 education goal is to make all kids feel safe. have no homework. fire all the mean teachers. and i would make my mom make all the kids cokkies.

I'm not sure.

to have a laptop at their desks so if they don't understand anything or don't know anything they can look it up online so their questions can be answered and they can understand everything.

give them the classes that the want to take in middle school

ask them if they are doing well and tell yhe teachers to check up on the students.

i would have a tutor for every student that needs one to make sure they know the material and they don't get left behind in school.

COMPUTERS IN EVERY CLASS    EXTRA HOMEWORK    HARD TESTS

i would make sure tha every student is actively learning

i would provide every kid free laptops to ensure they had the materials they needed. and they would also be allowed to have cell phones in school. and texting.

Make sure that every student got their own laptop and every school had a smartboard.

make kids do what i say

i dont know my god

i would provide any technology necessary for their individual learning type.

I would make the techers tech them harder but not give them any homework and all the work that have to be done is to be done in school not at home i think that kids should have their their free time after school because just think about it all the kids are forced to get up for school so why not let them have more free time after school instead of making them do homework.

I would ensure that every student has a goal to reach about what career that want to take when they grow up. Also, that each child has the material to start learning the basics of that job. I think that if you're learning about something you find interesting, then you get a lot more information out of school.

One thing that I would do to improve schools to ensure that all students receive the education and skills they needto be successful is life would be interact with them ( give them alot of time online, personally talk to them and help them).

to make schoool more interesting.

to inprove the education and skills i would get teachers who care, let us use our personal electronics, and let us use more technoligy

have on line classes to get themcollege credits toward there collegeg they would be going 2

I would make sure that all the schools had quality teachers that students could trust and that care about the students.

more time to study

I would ensure that everyone is ready for thier future job by having them talk to the bosses of the companies they want to work at.

i would say something

well give every student the help they need,explain the subject very carefully intill they understand and much more

have good teahcers

Have online classes

I feel that if kids were able to use internet access whenever they need it would help. I think this because for the last three years I have done my homework by the computer so I will be able to look up something immediately when I need to. So I think that each student should be able to have a way to access the internet at any given time. Another act I would start would be to allow high school kids to take online classes at any time so they do not drop out if they are struggling with social issues in the classroom setting.

I would make sure that each child is receiving the right education and has access to the tools that could help them be successful in life.

I would give students different classes during the summer that could prepare them for the career that they may want when they are older.

I don't know

The one thing I would do to improve schools to ensure that all students receive the education and skills they need to be successful in life is let all students have a laptop and all their work and lessons be on it (like an online class).

I don't know

My #1 education goal for everyone is to make sure that everyone graduates. Make sure that all the teachers are good and nice and not like Ms. Bach, no more homework unless it's studying, I would make sure that students could sit wherever they wanted to. I would make school a more fun place :)

Every student at their school can pick certain subjects that involve on what they want to do when they grow up.

I would let students have more freedom and be able to use electronic devices during school hours

computer savvy with a lot of ?

I would let kids choose to sit in a regular classroom or they can be in the computer room learning on the internet (it is the kids' choice) and they can use real tools in science and not just watch the teacher show them how to do the experiment (only if they want to watch and not do the experiment)

that they can not be scared to ask questions

To improve the schools, I would make the learning fun for the kids and make them more into the subjects they are learning.

Make sure that all teachers actually care about the students and their grades.

Every kid gets technoligaly trained at home.

One things i would do is make sure everyone has acess to internet.

I would give more test

i would make class for special careers and make school longer!

I would make school harder.

they need to make school more fun and more field trips

Schools get to do a lot more fun projects and have every student envolved

sub for an adult for one day. you could pick the job you wanted with your friends.

i would cut more "no school day" and for every "snow day" i would take it out of there summer. i would let school districts add a new extra subject make it a regular class.

I would give kids free internet access all day long

one thing I would improve is the school's websites so you be able to email teachers, listen to a recorded version of a lessen, printable homework sheets if you lost your original copy, online tutors approved by the district, internet sites that help each student study or get help with homework.

I would make sure that every student has the help they needed to succeed and they could always feel safe.

I WOULD MAKE SURE THAT ALL STUDENTS ARE GETTING THE EDUCATION THEY NEED! IF THEY DONT UNDERSTAND THAT THE TEACHER WILL EXPLAIN SO THAT THEY UNDERSTAND IT!!!!

I would make sure that kids get the education they need and give all young childern free education in school.

I would make sure schools made sure their students got what they did by checking over their work and if they did bad on it they could redo it about 3 times and when they got into college they wouldnt be able to redo their papers anymore but they could stay after class with another experrt on that specicific class and ask as many questions about what they didnt understand about that subject that way they could learn and they could get a higher/better grade in that class

have ateather on every job in the world.

get every schools test results for 1 month and i would visit the lowest school and highest school

i would make sure they would be able to pick classes

I would make sure every student is getting individual help

make them play football and tackle not flag

Have the school stop wasting money on the teachers Lounge!!!

I would have subjects for hiher education that focused on pacific jobs.

start teaching advanced segments of math and other subjects at earlier ages.

Have them take test that would help. I would get them started on the SAT. Help kid learn the importance of collage ang how it will help get a good job. Show them things that would help with jobs. While giving the test there teachers were teach them the things that the kids were having troubles with.

i would make people go and check on the students, and see how they are doing..

I would build more schools were they are needed. Make sure every kid is going to school. Make sure the schools have good principals and teachers. Make sure the teacher know all the things they need to know on their topic that they teach. Make sure kids know all the things they need to know about what they want to be when they grow up.

If i was president i would be happy because i would at least give the poor enough money for beds, houses, covers, clothing, and some food. Maybe give foster children a better home for them to live in. I would also let kids have a right to vote. i would be happy if life was perfect. I would be so happy if everyone's life was completed.

I would build more schools where they are needed and put technology in the schools to get the students more invloved. I would make sure the teachers know what they are teaching and the students are interested in what they are learning. So each student has a good idea for what kind of career they are going to have I would let them see what jobs there are and they could try them.

give schools money, new compters, new schooleplas.

If I President of the United States, and my number one goal is to make sure every student is prepared for the jobs and careers of the future, the one thing i would do to improve schools would be to allow more availability of technology.

I would make sure every student goes to college and take 16 classes a semester and i would make sure every kid likes going to school and they now teir is some one their for help if needed

to make more schools have enterneat accses,and intersting topics

The one thing i would do to improve schools to ensure that all the students receive the education and skills in life is to put more fun educational works in life.

i would make sure every one is having fun when they learn. like mabey playing a word game or showing a project. also more learning videos.

The one thing I would do is provide more classes to make more jobs available to everyone.

i would improve the stuff that u learn

like in math the stuff is going to fast i would like to slow things down a bit so everyone knows the stuff the you are learing in math and in any other classes

i would make every student take P.E. Science And math so they can be smart and healthy and athletic

I would make sure all students where interested in what they were learning and do what every it takes to get them interested.

I would hire people to check how schools are doing once every two weeks. The person I would hire would hire would supply the school with all the schools needs.

I would try to get the best teachers and the best subjects

i would improve the tcnology of the school that don't have any I would also make sure that those schools would be repairedand add tecnogly to those schools

I would make sure every school has at least 2 computer lab s and that ev ery student would do research on them at least once.

All students should get help when they need it because they might not understand everything. I would also provide more classes.

I would have everyone on a laptop/computer and they would have some websites to look at about jobs so they could see what they might be interested in.

I would give students their own laptop to figure out mor information. Also, I would shorten the day but with more information to every kid. Lastly, I would make sure that every student has a certain class they could take about technology.

If I were president I would help kids get ready for theyer career by letting schools use more technology/ like smart bords, laptops, and online classes.

I would make sure every student get"s a fild trip to the job they want in the future and in the classes the teachers would talk about threr job

Ask what they tink about that

I would provide tutors if needed i would make the schoolday longer and make school more itersting which would make the kids more ived in school.

Have more technology.

read A good book

listen to your teacher(partner)

study no matter what.

i'm going to help ta poor people

make sure teaches arnt mean like the mean teachers.

i would tell them every thing they need to know about the job they want.

I would provide more freedom to prepare them for LIFE!!!!!!

I would give all schools a career class that would teach them how to get into a career.

i would have them work on what they want to be when they grow up.

make sure every student has equal opportunity in educaion.

I would put in virtual realite googles

Make them get through all there college and all there classes

I would make sure there certain classes the students HAVE to take.

I would make classes longer because kids should learn alot more and like school more.

I would lengthen the school days and the school year.

I would have virtual classes that teach you the same thing over and over

I wouldn't give much homework I would just add on half a class.

I would have a honors class for gifted suudents and a program for disabilities.

ask questions-online classes-interesting classes

make sure the students ask questions when they dont understand something so there not behind the other students

all schools should have career day, and every student should have an idea of what their career would be, so they know what to pay close attention to in class.

I would make every student in the world take every class to get used to them!

Better school suplies, online classes, portable laptop for every student.

make online classes more popular

Make sure they have math, science ,and gym .

I would let kids have cell phones and ipods with educational songs on it.

College would costs less. That way the poor can get in.

i would help all students to have tutors

The number one goal for education is too makes sure kids are learning what they need. Or too make them want too come to school everyday because they know something exciting is going to happen.

if i were the president i wold want kids to be able to be good at math cause your going to use it the rrest of your life and your not going to use any other subject in your life like science,geograph,and band

i would put them in classes based on a test of what job they might get

aaaaaaaaaaaaammmmmmmssssssnnnn

i dont know

recess get fresh air and fire Mrs.Cole she works at saeger middle school at st.charles MO

i would tell schools to talk about what job they would like.

make sure they succed.

put all of them in the best colleg they can find and coleges will be free

make sure teachers fun and skilled.

I would make sure if a kid wanted to be a teacher the teacher would let the kid watch and help in her or his class.

If i were president I would make sure that education was the best it could be. The nuber one thing i would do is to make sure kids were having the best education possible. I would not want schools to have not very informational text books. I would make sure the kids were understanding everything that gets taught . I would just make sure it was the best for the kids, not the teachers.

i don'tknow

let people have fun and banned school

make school a better place

I would provide more technology at schools and make sure it was used in the school day.

give students the opportunity to have their own laptop and have hands on learning and make the classes fun and have them teach more concepts.

One thing I would do is get them involved in a activities so they can be comfortable.

I would make sure that every student of every school has the tools they need for success by donating each school plenty supplies for the students for an entire year.

I would visit classrooms to make observations.

Give the kids some ideas for jobs. Find out what they are interested in. Have teachers teach the kids many subjects and provide online tutors.

I would be very strict.

i would not sort people by age. I would sort kids by how quickly they learn and how smart they are so others don't get left behind. I would make sure the students could learn at their own pace.

i would let students use their laptops and cell phones as long as they are working.

I would allow students to go into a class and get the knowledge of that lesson whenever they feel ready

Tell them how to survive in college and high school so that they can get good grades and graduate.

I would make sure that all schools received enough funding for books, a computer lab, a gifted program, school field trips for educational reasons, and equipment for the science labs.

I would improve art in the school.

I would give every student a laptop and let them learn in their own styles

I would make sure that every-single teacher in the school is HIGHLY qualified and cares deeply about the well being of children and understands them.

make sure every student learns at their pase

teachers that care and dont yell cause if u do that kids will not care anymore and prob go emo.

MAKE SURE THAT EVERY SCHOOL HAS EVERY ONLINE CASS THAT YOU COULD THINK OF. THAT STUDENTS COULD LEARN WHAT THEY WANT.

i would give them longer periods and they would go to school at night so they all would be knoke turnul

**SAEGER MIDDLE**

Introduce different things to them other than textbooks and pencils

Well I WOULD MAKE SURE every kid of every race went to school every day and if he got below passing 20 lashes no just kidding i would give him another chance if he failed again then 20 lashes (laughin)

i would let students text in class about stuff

I would make a speech on if they got a very well helpful job and how i could change the world and getting rid of polution and helping the world animals???? = )

The #1 thing I would do to help all students be prepared for jobs and careers is to make sure they are comfortable with who they are. If they do not like school that would be a problem. I would try to fix that.

i would improve our schools by up grading all books and websites and school related objects

i would provide laptops for all the students, unlimited internet, great teachers, cell phones. to help the, learn more about stuff.

i would ensure that all schools had at least 18 computers in each room.And I would ensure that there was a technology class available for each student because technology is becoming more advanced and more used over the years.

let them be what they want to be if they don't do the work than they don't want a good job when they grow up

I'm not sure

Create new kinds of school programs that benefit public schools a and assure that all students learn what they are supposed. Do nationwide tests that measure if all students are learning what they are supposed to much more often.

I would make sure each student has every class they need to be prepared.

i would let students bring their laptops (not provide them) to school and let them use computers for writing papers, searching research, and lots more.

The one thing I would do would be to make sure that students were getting the education that they needed for a better future. All students would be able to work at their own pace. This way higher students would not have to be held back and wait for the slower students. The slower students would not have to be pulled ahead into topics that they do not understand when they are already having trouble in school.

I would have a job day were all the jobs in the world would come in and talk about what they do and how much they make.

My #1 thing would be that they should chose there own classes that could relate to there jobs that they would wont.

if i were a president i would have the school principles have their students take the exact survey that i am taking now and they should have the students be more involved in the united states or more in life.the students should be more involved in after school activities because i have always been told that i should be more involved in after school activities then i will be better at schoolwork and better at homework.

i would here every students suggestion on what they think would be best and if i like the idea ill might consider it.But I'd get a good based smart board for every teachers room and I'd also get all access to the internet in a certain hour so the kids can have a break.

to ensure that all students receive education and the skill they need i would give the school some money and make sure they waste that money on the school not a little for the school and themselves.

One thing that i would do as presdant to get students redy for a job is i would give more goverment funding to the schools so that they could get better resources and then students could get more educated and redy for life.

okokok

i dont know

i would make a flyer to all the kids and ask what they want to be in the future so then ill make a class with every career you can have that they want and let them still learn basics

I would make sure by have more classes desind like haveing a real life job

by makin school is fun

iwould totally getrid of schools permanently forever!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

I would make sure all schools have a class of choice for specific jobs that many students would want.

Let people from those carreers come in and talk about their jobs.

I do not know

I would make sure that each student had a laptop and that on the internet there would be online classes for each subject that a student might want a career in.

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

choices on classes

that every student is learning and feels safe at school. and that they enjoy learning and i would put more computers activities

Give them more technology based things.

I would maybe cut the teachers salary becaus esome teachers dont teach very well because they already get a lot of money.

the students take the classes needed for their job that they want so that they have the education that is needed for that job.

too narrow

Improve technology, and make sure that teachers know their students well, as real people, not just people that they teach.

Make sure all kids graduate from Highschool

i would make it easier for the students to learn

no opinion i can't talk to !

male sure that they are educated not only in classes like science and math, but also about life and relationships, and that they are prepared for adulthood.

i would make sure that they have teachers who know what they are doing. and want them to do good in life. and make sure they have all the books they need. and make luarning fun!!!!!!!!!!!!

have real jobs set up in school so you can learn how it works in the real world.

i would give the schools more money so they can buy the supplies they need to make our school systems better!

make sure schools are clean and safe

I would have each student pick the top 10 carrers that they wanted and have them study 3 of those and study them in 10-12 grade.

if i was president i would make sure each student gets the help they need to succseed. i would also provide each student with their own teacher so they can be provided with the information they need to have high skills and succseed in ther life goal!

I would make it a requirment to have career day at all schools with different people from many occupations. That way the kids get a feel for the job from a real person who works in that field.

alot of things. It would take to long to write. I could give a seven hour speech about it.

brain wash them to be really really really really really really SMART

give everyone laptops!!

I would create a survey, and see whether or not the students are getting the education they need based on what they want their carrer to be. If not, I would create special classes, where the student can learn all about the carrer they are interested in. We are learning skills that we will never end up using based on our carrer later in life.

let us have more freedom

Girl

Grade 8

I don't want to be president

if i was preident of the united states i would make sure every student that goes to school has a labtop to have access to their classes incase their sick and doesnt want to miss class.

1. i would make them most go to collage at least 4 years

2. if the parnt is not able to buy a lab top then the gorverment should buy it . it help the student more understand using computre because now a days almost everthing job included a computure and it will help learn how to look up infmoration better and more like video about it and more in to it.

i would make the schools go on more educational field trips and give them online job simulations.

I never want to be president.

make classes of every career and let students pick them.

I would give all schools the same amount of technology.

give them less school

everything that could or would help the students school education or job education.

To have at all schools have classes that students are interested in taking for their jobs for the future.

i would make them a lot less boring

I would let them explore the job they want to participate in instead of school. yah thats right it happened again i just pwned u n00bs so hard its not even funny.

let kids use electronics in classes

have classes in all studies for each school so every kid can study up on what he wants to be in his life

If i was the president i would lessen school workkkkkkkkkkkkk

i dont know.

i will make a law that all students should be able to have there cell phones out at school.

I would make sure every student had the abilty to have an education. Each student would have to take the classes of Communication Arts, History, Science and Math. THat schools have access to multiple computers.

make new jobs for starters that didnt want to go to collage

I would make sure ivery student had their own labtop for personal work and had fum mor interactive classes.

i would give enerybody a labtop and teach them about the carrer they would want to do.

I would offer many different programs such as computer technology and languages classes.

have advanced classes for people who are ahead but at the sime time a way for people that physycaly cant do it have some sort of extra classes or slower pace for graduating grades but not holding back the people that can do it.

Oh the first thing i would do is like have more schools districts get right on point with their schools and the teachers get right on point with their students. I would make sure that every student would at least try to get a job from 8-12 grade. Let them have more educational videos. When they like miss school there is a online class that they can take to see what they have missed and do they work online and stay right on point with everything that they do. Have students take at least 3 or 4 tests every other month to see how much they know and what the teachers need to teach them. At least have homework in about 2 classes over the weekend not like all the classes your piled up with homewrk and it takes you like the rest of Friday night to do. Have lots of school projects to make class more fun.

The thing I would want them to prpare is their social skills because if cant talk to people well and you get nerves it is going to be hard to get a job.

Make sure that every single student knows what they are learning before moving on to the next subject. make sure that everyone has a laptop to research there problems that they want to fix.

Girl

Grade 8

i would never be president i want to live

I would make sure students are learning at their pace and understands what they are learning.I also would change the amount of homework to a minimum so the students are able to complete the work.I would also ask them what they want their career/job to be so I can help them pursue their career.

Have the students choose their scheldes and pick what tim they want to have a certain class. I would have the students have an hour of study hall, each day. And pick what hour they want to eat lunch.

i would encourage them to try their best.

use the computer for everything

I would let the students have the freedom to use there technology to there advantage because most adults can probably admit th=at kids are much better with computers and that they know how to use them better. Same with cell phones most adults just know how to call and some know how to text. Kids can access internet, music, ringbacks, ect. The point is they know what their doing so they should have the freedom to try it.

I would give every student a new laptop to throw at the wall.  
Then I would run to Canada The end!!

i would add more technology and allow more stuff.

I would make classes harder and do what colledge stundents do. I would make them take more notes to get them prepared for colledge.

To prepare the countries citizens for life with good education, we must issue a new education system that can keep up with the fast growing era of technology. This means we must update our information sources, our internet acsess, and our computers, and other tech. devices.

I LIKE JOBS!!

I would be sure that each student has at least grauated college with a 2-year degree

i would begin with providing them with laptops pc

give them more tax money

Boy

Grade 7

i would do everything to make sure that the students are happy and like what they are being taught.

thay try best

If I was the president of the U.S, the one main thing I would do to improve schools to make sure that every student gets a good education so that they can get good jobs would be to make it neccessary that all teachers recieved time to get to know each student so they could learn their personal needs and incorporate technology and such to help each kid get what they need out of school so they could get a better job. If this meant that class sizes wuold have to be decreased, then thats what would have to happen, because I feel that no kid should have to get stuck working at a Burger King untill they have to retire. Everyone should get the chance to become a doctor, no matter how well they know addition or if they know the difference between Venus and Mars. Teachers should be able to get to know the students and help them so that they CAN know which planet is closer to the sun, and how to add 2+4. Its their right as a student, however, to decide wether they'll take that for granted or not.

Make sure students are treated equaly, and make sure teachers are teaching the right education programs.

One thing i would do to improve education is to give them every single electronic thing like lab tops, they could use there cell phone, their ipod, ect.

Help students be interested in school.

I would give them unlimited access to internet and educational resources mso they can study and learn as much as they want.

ask them if they are doing well and tell the teachers to check up on the students.

?????????

I would make sure teachers went to each student and asked if they needed help. Also i ould encourage teachers to talk with the kids who arn`t doing as well as others. Also would ensure proper funding and educational tools in all class rooms.

the thing i would i do to make sure every kid was prepared is i would supply them all with laptops to help them with the future so they can resarch what they want to be and how to be it

to uas tacnalgy

I would make sure that every student has their own goals and that learning is individual with online classes so that every student can learn at their own pace. Unlike the classroom where teaching is not as personal as it would be with online classes.

I would provide a funding high enough to provide the tools that children need to prepare for the future like laptops, computers, etc. i would also provide teachers willing to put all their effort into providing the right education for them and putting forth all there work to give them all the information and prepreation to help with there future careers.

If I were the president my top priority regurding education would be that students are introduced into math and science in a fun way. I would improve schools by providing a law or recommendation that more labs are introduced even in elementary.

Make sure all the teachers are experts in all of that subject.

Well, I'd make sure that every student felt safe at school. And that we had teachers that AUCTIALLY care about the students Futures.

One thing I would do is be sure those who want to learn, learn and those who don't don't. Some students don't want to learn at all yet the government continues support of them, which then lowers school funding for other activities/instraments for those who want to learn to excede

I would provide everyone with an option of the classes they take.

have more personalized classes and assignments

Boy

Grade 8

i would make sure that all the teachers were well qualified to be teaching at the level that they are and make sure that they can help all of the students.

I would make shure every student gets through highschool

i would try to get teachers more exited about their job to try motivate students.

if i was president i would be able to tech kids how to be smart as there parents.

i would make sure that all students have an access to a laptop/computer,have a hand held electronic textbook for every class.

I would ask kids in high school what they plan to study in college and then make sure they are taking a class that involves that subject.

to organize clubs for jobs

tutors are avalibale and check all grades and provideall the hep that students need

i have no idea.

I'd make all schools more friendly and more interesting so the kids are haveing fun, but they don't know there learning.

the internet capability

have people learn

Have all schools have a lot of technology

I would make sure that every body has to have a cetain amount of study time on the internet to help them.

I would make sure that they have dsimulations as to what that job would be in every school across the district.

Have programs where students can work at their own pace.

I would try to make school more fun for kids and try to make tpoics like math or science.

If I were the President of the United States and had to make a #1 education goal, it would proably be let students have laptops and let students be able to share there opinon becасue students never get to talk and share there opinon.I would let students pick there classes and then after class they would have to write down one thing they learned in that class and then have a test every friday and is if they are gettinf worse or better at school.

i would make sure that they arre prepared by make a day where they pick a job that they feel cofertable with and have them work at whatb they really wont too do

themn i would have them studdy at what they did  
so they know that they for sure want to do what they

chose

then i would have a test to make sure they are modavated to do it

I would make each school makes there students to get on the computer more and do a topic on a subject that there interested in becасue it is the kid's choice to what they want to learn.

The one thing i would do would be to add a class about career options. I would have a class for every type of job.

im barock obamo suka

i dont know

I make it a law that everyone has to go to collage for a least  
1 year or more.

nothing at all

give each student a pass for anything they want

if the kids need extra help the school will offer that to the student so they will be able to have a successful life and be able to prepare them for high school and college

to be a marathon runner

my #1 goal would be that all kid have the same education.

To make a pliesofeser at afrey school

i would stop war in irag

i would make sure the teachers are teching stuff they need to no.

I would improve schools by letting them get on different web sites and give them more time in class.

I would be sure to get every school in the country to get good internet access that is fast, and doesn't block every site that is full of information and ideas. I would also be sure that all the teachers would have a monthly message to the students, so that they know what their choices are when they get good grades. But if they get bad grades then they could have a bad job, get less pay, and not live where they would want to live. The last thing i would do is to make all the students in the whole country to take a survey like this one to tell me if their school is teaching them what they want to get taught.

I would make every thing done on computers and hand held or cell phones so stundent could have fun working. . . . .

give them morn fuding so they can do better in school

I would let them us there cellphones to get on the internet if dont have it in the room avibale (:

Let students know that you care about them as an individual.

I will get lot of teacher

make classes fun. no home work. no work at all. more cummunicating less silent time. more partner work.

I would make sure every middle and high school student had to have a certain amount of credits to move on to the next school. For middle schoolers you would have to have a certain amount of credits to go on to high school. Same for the high schoolers only they would be going on to College(hopefully). Also i would make online classes for middle school, high school, and college students because i think by the time you reach middle school, you have reached a certain maturity that you can take on that responsibility by them selves.

I would have each student have a laptop. That is helpful because they can have video conferences, online papers, and other stuff that is super duper and very very very very very helpful! YEA

Give them all labtops and full internet access. Also better food so they can concentrate.

get laptops for homework and intenet acess.

i don't know!

make sure there getting the help they need

The one thing that i would do yo make sure that studants are more prepared for their jobs in the future is that i would make classes for the main jobs that people want to go for for their job when they grow up.

free laptops

The one thing i would do if i was the President to improve education is to add more advanced class that give credits.

higher more teachers

Girl

Grade 7

The first thing I would do is make orginazation a priority in schools, then I would recommend the use of the state of the art technology in the school environment to promote the students ability to learn.

SHUT DOWN the system< and everyone (at least that I know of ) will be happy and world destruction will come.

The one thing i would do to improve schools to ensure that all students recieve the education and skills they need to be successful in life is to make sure all schools have police officers on duty all the time at the school. And educationly i will have teachers that for sure know what they are doing with the future adults of our country by theaching them geography,science,math, and communication arts. Tommorows adults need to have education in their brains and if i was a president i would definately make sure that happens.

I would make sure every student understands what we is going on in the class because they need to understand the concept just like everyone else does. I would also make sure that everyone is treated exactly the same so everyone feels equally treated and no one is left out.

I would make thier class 3 minutes longer, make them take a career paper and tell me why they want to do this job. They need to do alll of there homework and never get in trouble by and teacher, parent or an princidial.They need to decide what job they want to do.

To make sure every kid makes it through college

i would make a survey asking students what would they like for a career. then i would average the careers of into "groups" (wich means id peace together the ones that relate to each other.) then make schools for children based on those related "groups" there would be no an age limit of 10-18 and all of the schools would be public.

I would make sure that they know about what they learned in school because I would give them a quiz at the end of each week to make sure that they know on what they learned in school.

i would make sure every child got an educaton. also i would make sure that every school has good acedemics.

I would make internet classes for kids to improve there knowledge. I would also supply great textbooks for kids to use.

once the students get older, i would offer a class about their future. it wuld include picking jobs, paying bills, getting paid, and buying a house. hopefully the kids would figure out what its really like.

i will make sure all students know how to do math,read and write

idk (i don't know)

I woud take tax mouned a litt bit for schools.

To mke sure all students are oginized.

i do not know

i dont want to be ethier.

I would make sure every kid whent to collage!

I would make sure that every student was olearning what they needed to learn and that they were not getting bad grades in school. If they were behind in anything i would consiter online classes, after school classes, or tutors.

To improve schools I would make sure that every kid would come to school everyday unless they were sick. I would give them the oppertunity to use the internet for whatever they wanted to. And I would let kids have their safty.

i would make every school free

give them i pods

I would make sure every class had a time strictly for studying, or make the classes shorter so every body would have time for a study skills class.

i would put more computers in the schools

I would have all students use a hand held device.

i would stop off shore drilling and make shure all kids would get a great education

i would make a law every kid had to go to school make sure every teacher gave out 5 pacets of homework a day

if i werepresident iwould help everyone get acollege degree.

i would have students be able to use electronic devices in school

every student shpuld get another chance on a test if they get an f and if someone has a speacial way of learning then they should have someone to help them learn in their speacial way amd everyone should get a chance with no one left behind

make sure every student is able to graduate form high school and some college. get personal help if there are gonig ot drop out our a realing good tutor that will work with them each and every day.

If I where president I would have very educated tutors in every class. If the student didn't turn it in on time they would get a ZERO on the assignment. Also the students will get two days to work on the assignment.

do I have to answer this shit

Make schools give the students laptops for getting all A's

to make sure that students have fun at school and have constant access

Give students up to date technology.

I would give every school the equipment needed.

make schools a better place for learning.

One thing I would do to improve schools is make it so that every child passes school and is able to learn what they need to learn.

make a teacher for everystudent so that they could learn indivudly so that they would learn the way there brains are desined to learn aka so that they learn thing so that they understand it all easily

i would make sure that every teacher is doing there very best to teach the kids the best and really cared about there education and how successful they are in life.

no students get held back and make school more efficeit

Let students have a personal turtur.

i would put people

Girl

Grade 6

I would make sure all of the teachers are very well trained.

let people do wat they want as long as there is no murder or thievery

One thing I would do is add another class on the last two years of high school to teach them how to balance their check book and other vauluble life skills so they will know how to "survive" on their own.

**These comments are unedited and may contain material not suitable for all audiences. Please review before circulating.**

make students have longer days at school (200 instead of 180)

since the children from china have many days of school per year and are leading in being the most educated why shouldn't we?

I would make one more class a day and make that class about learning about jobs and how important that your career will be when you will grow up because it is very hard to even get a job if you don't graduate from a good college

I would improve schools by providing more internet access and being able to text. I think texting helps you learn. Texting is a cool way to talk to your friends and ask them questions. Texting would make kids want to go to school.

I would raise school funding so students have better equipment and more updated books. with more updated books the students can know the most resent news and be better prepared for tests in the futrue.

I would have it so every child goes to school even if they can't pay the cost by having more fundraisers and donations made by parents, students, and teachers. I would also lower the price of our lunches because if someone doesn't have enough money to eat they could go hungry and maybe pass out.

I would make sure of that by making every school offers classes for each job that students might want to take in the future.

know what you want to do for life!

One thing i would let the student chose what topic they want do for their career and let them study it.

They need to stay in school to do good things.

let people do want they want as long as they dont kill anyone

teach more in areas about jobs

One thing that I would do to improve schools to ensure that all students receive the education skills they need to be successful in life is have more schools and offer more advanced classes

I would make sure the teachers are doing their job and the students are well behaved.

i would make school fun and let the students use electronics and other devces and have a half day every week and let them have fun

i dont no

I would make all schools have more nicer teachers that will help students and make them have fun at school but still learn a lot.

i would not leave eny kid behind i would let kids have a choose about which school they go to and what food they can eat i think that they should go to school until there 16-18

To get an a in one class and the others have at least a c average.

what I would do if I was president and wanted every child to have a career in the future i would make kids go to college and I woudlnt let them drop or get kick out of high scool

i would improve of more thigs to lean i geogrfy like news and other things and onece let the kids see what it is like chooseing a progect(with a partner)so that they can have some help with the patner and not the teacher they can disid what its about and how they do it

laptops, for research and special small classes to help in the field they need.

make sure every student had technology acess all over with all nesseties in this quiz

If i were president i would make evry school have at least one toutoring class.

make sure no student is left behind in classes because they're slower than the other students and make online courses and extra credit classes so everyone gets a fair chance.

get well skilled teacher that are fast and very useful.

well first id need to no what they want to be when they get older, so that i could put them in a class that would be helpful or them to no what there looking forward to in the future.

I would let if students wanted they could purchase a labtop at the begining of the year and if they didnt want one then they would just look at the smartboard !!! :D

maybe get extra attention from teachers by making classes with less students

I would ask students to find a topic or field that interested them and have them prepare specially on that subject as well as the regular knowledge.

Go to all the schools and talk t the principles and ask what kind of things are you doing the classes

I would fund programs that help struggling students with their work.

i would make sure very one gets a laptop for school to use for each class

WELL FIRST I HATE OBAMA SO DON'T MENTION THE PRESIDENT PLEASE AND I WOULD MAKE EVERYONE DO SCHOOL FROM HOME ON SECOND LIFE  
CAUSE U CAN DO THAT AND ITS AWESOME THATS WHY GOTTA GO FINISHED NOW I DIDN'T LIKE THIS BORING QUIZ SEEYA LATER  
ALDERGATORS :) :) :) :) :) :) :)

A good education that is interesting so they would not get board so the teachers can have there full attention.

make classes on what they want to proffesion in

i would make sure they have homework on monday and wednesday and make sure they get there homework let them learn about jobs

I dont know

I would try to make it to when students are at schools they can take any classes that could help them reach their educational goals. I would also try to make online classes if schools couldn't make this classes.

I don't know

h'uiuuuytftfufu

I would make sure the school is right for the students ( not mean,and if they need computers or money for their school

make sure they are learning the topic correctly

let them go to work with there parents or go to Jefferson where kids run the place.

I would make extra classes.
